Relevant Experience

Web Developer ○ NetlinkVoice ○ Feb 2023 - Present

- Works on multiple project - create, update, maintain and fix bugs as well as integrating new features based on the clients requests.
- Provide a new system or service that is efficient and serves a variety of functions while integrating and correlating well with their primary system.
- Upgrade existing system into using newer versions of the frameworks, such as Vue3, Inertia-Vue and Laravel Filament. While keeping the current system's code clear, concise, and testable
- Provide a new system or service that is efficient and serves a variety of functions while integrating and correlating well with their primary system.

PHP Developer ○ CSO Projement ○ Mar 2024 – August 2024 (Project Based)

- My core duties is to create, update and maintain functionality on the website.
- Collaborate QA's and project managers to deliver projects on time and within budget.
- Troubleshoot and debug applications to optimize performance and ensure functionality.

Web Developer ○ Eversun (ESPC) ○ May 2020 – Dec 2022

- My core duties include proposing an interface and ERD design, managing server (deployment and maintenance), connecting frontend to backend APIs, testing and debugging, while also learning different kinds of tools that are necessary for the current problem at hand
- Lead a one project - collaborate and distribute task to my co-developers, do code reviewing and communicate with client hand in hand
- Collaborated together with QA and other developers to ensure thoughtful and consistent user experiences across the system.

Intern ○ DSWD Reg. XI ○ June 2018 – Dec 2019

- Gather information about each DSWD department - through monitoring of transactions and data flow observation, identify an issue and produce a potential fix.
- Proposed a solution, a web-app that would assist the DSWD department in automating procedures, making data monitoring simple, and reducing client interaction.
- Create and develop the app. Proposed an initial design, develop the design once approved, handle the deployment of the system, fixed found issue, and add features based on the user's request.
- Provide personnel with a demonstration of the technology, document it, and deploy it on their premises.

Selected Projects

Soc365 ○ NetlinkVoice
- a web-based platform used to track clients' employee's security awareness and training and development initiatives, it analyze data, and summarize staff development to help clients pinpoint areas for security improvement.

CandidateRank ○ NetlinkVoice
- a fully automated and integrated resident fellow interview process. A web platform that helps human resources track, classify, and process candidates.

ConX ○ Eversun Software Philippine Corporation
- a web and app-based platform that assists contractors of all kinds that are dealing with labor issues, primarily over and understaffing.
